BA 4848

Non-Silicone Film Masking Tape for Anodizing

Description:

BA 4848 is a film masking tape used to protect surfaces during the anodizing process. BA 4848 is a single sided non-silicone adhesive applied to a polyester backing with a removable polyester liner. The liner makes tape great for applying to large parts or converting to unique sizes and shapes on any knife cut table or other die cutting equipment.

Features & Benefits:

- Can be used in post painting process
- Clean removal
- Flexible adhesive that adheres to irregular metal surfaces
- High chemical resistance to chromic acid, sulfuric acid, boric-sulfuric acid, nitric acid, sodium hydroxide
- Transparent carrier, for easy inspection without peeling off the tape

Applications:

Anodizing | Painting | Surface protection

Construction/ Typical Properties	Value		Test Method
Color(s):	Transparent		
Liner Color:	Blue		
	Imperial	Metric	
Total Thickness:	5.1 mils	130 µm	
Tensile Strength:		238 N/25mm	
Adhesion to Steel:		7.5 N/25mm	

Approvals:

- BAC 5034-4 Chemical Processing
